

Frequently Asked Questions & Program Updates: COVID-19 Response  
**Stockton University**  
*M.A. in Counseling Program*

April 28, 2020

**PRACTICUM AND INTERNSHIP:**

*1. How should we move forward at our practicum/internship sites if and when they decide to move to distance forms of counseling?*

Beginning, Summer 2020 (May 18, 2020), our program will recognize online/tele-counseling provided through your practicum/internship site during the period of the New Jersey State COVID-19 related health emergency ([NJ State Response](#)), if your site and site supervisor authorize this continued clinical engagement AND you continue to receive individual supervision from your site supervisor. This does count for direct hours. Follow your site/agencies — their policies and practices — and the guidelines/resources for telehealth (APPENDIX A).

*If you are starting Internship in the summer:* Please note that you must be enrolled in the Summer 2020, Internship I course to clock any (indirect or direct) hours.

*2. What counts as direct hours at this time given the stay at home orders and lack of face to face (F2F) direct contact?*

In line with CACREP (2016) standards, approved direct hours take the form of:

- a. Psychoeducational presentations/workshops: Students can create and provide or record lessons/workshops/professional development that students/clients/colleagues could view on-demand. Recorded lessons count only for direct for the duration of the recording. If the presentation is ‘live’ online, direct hours occur each time the presentation is given.

please have a weekly e-mail communication detailing the hours each week for your records. At the end of the semester you can turn in unsigned logs with the attached emails and your course instructor will sign off on those approved hours.

4. *In terms of finding a site for the Fall 2020 semester, should students continue to reach out to potential sites?*

Yes. Even if you are told that the site is not accepting applications at this time, we expect you to have made a connection with them. You can let them know that you will check back with them once the COVID-19 situation has stabilized and sites/agencies are reopening.

If you are planning to continue at your practicum site from Spring 2020 for Internship I (Fall 2020), we highly recommend that you continue to make frequent and open contact with your site supervisor throughout the summer and secure your Internship Agreement form in anticipation for your Fall 2020 placement at the site.

5.  
*semesters?*

We will do our best to assist students in securing a summer or fall clinical placement site. This is an unprecedented time and we simply do not know when programs will again be operating for direct human contact. Please stay in touch with the Internship coordinator and your program advisor/preceptor, and keep them posted as to your progress and areas of needed assistance. ***It is your responsibility to reach out and keep faculty up to date on your progress.***

6. *What if a site has already rescinded its offer of a site for the Fall 2020? Should I check back with them after the crisis has subsided?*

Yes. And you should begin searching for additional site opportunities as well.

7. *Will the deadline for submitting paperwork (Internship Application and Agreements) for practicum for the summer and fall be extended?*

We will work with students until they are able to secure sites for the summer and/or fall, please reach out to your program advisor and internship instructor for guidance. In terms of the previous deadlines, for Internship I Summer 2020 the deadline has been extended to April 27, 2020. For Fall 2020 the deadline is July 1, 2020.

Please note that in order to begin clocking your hours (both direct and indirect) in Internship I you must have the following fully completed and sent to both your course instructor and the current Internship Coordinator:

1. Internship Application
2. Internship Agreement
3. A copy of valid and current liability insurance

8. *What changes if any have been made to the Practicum and Internship handbook due to the current situation?*

Given the COVID-19 pandemic and the unprecedented and uncertain times ahead, we have prepared an addendum to our original program handbook ([MA in Counseling Clinical Handbook 2019-2020](#)) that includes an update on the following policies:

1. The

who are transitioning from face-to-face to online c

## APPENDIX A: Risk Considerations and Telehealth Practice

As the provision of healthcare services via technology—commonly called telehealth or telemedicine—expands during the current COVID-19 emergency period, questions arise regarding the permitted scope of practice, licensure requirements and compliance with the Health Insurance Portability and Accountability Act (HIPAA), among other regulatory-based inquiries. It is important for healthcare practitioners to understand the risks unique to the practice of telehealth, as well as risk management best practices, including:

- ◁ Verify authorization to legally practice telehealth.
- ◁ Safeguard patient/client data and comply with privacy regulations and disclosure protocols.
- ◁ Monitor outcomes for clinical care and technical support.
- ◁ Create and retain formal patient/client care records for all encounters.
- ◁ Engage in continuing education to ensure key competencies.

*The information and regulations regarding COVID-19 is rapidly evolving and changing. The questions and responses below provide basic information to practitioners and are intended to serve as a catalyst for a practitioner’s further inquiry into the federal and state regulatory framework for telemedicine/telehealth. It is **the responsibility of the qualified practitioner to know and meet the requirements necessary to provide telehealth services to their patients/clients.***

### **How are practitioners expected to ensure the privacy and confidentiality of patients’/clients’ data during the novel coronavirus (COVID-19) national public health emergency?**

The HHS Office for Civil Rights (OCR) announced on March 17, 2020, that it will waive potential HIPAA penalties for good faith use of telehealth during the nationwide public health emergency due to COVID-19. This applies to telehealth provided for any reason, regardless of whether the telehealth service is related to the diagnosis and treatment of health conditions related to COVID-19. The [notification](#) and accompanying [fact sheet](#) explain how covered health care providers can use everyday communications technologies to offer telehealth to patients responsibly. Providers are encouraged to review the notification, and to routinely monitor the [HHS Emergency Response](#) page for more information about COVID-19 and HIPAA.

This notice means that covered health care providers may now use popular applications that allow for video chats, including Apple FaceTime, Google Hangouts video, or Skype, to provide telehealths uniqueks uh th

A Note on Waivers by HIPAA:

*will exercise enforcement discretion and waive penalties for HIPAA violations against health care providers that serve patients in good faith through everyday communications technologies, such as FaceTime or Skype, during the COVID-19 nationwide public he want to stress that states have their own laws and rules (see NJ response link), and the OCR waiver does not release us from those rules. We also have the following ethical obligations:*

- Knowledge and competency in telehealth (ACA, 2014, H.1.a.)
- Specific informed consent and disclosure for technology-assisted counseling, including the benefits and limitations of using technology (ACA, 2014, H.2.a., H.4.a.)
- Use of secure, current, and encrypted technology, which Skype is NOT (ACA, 2014,
