

## **Survey Methodology [NJ Likely Voters]: 10/27/09 thru 10/29/09**

Zogby International was commissioned by the William J. Hughes Center for Public Policy to conduct a telephone survey of likely voters.

The sample is 1093 interviews with approximately 17 questions asked. Samples are randomly drawn from purchased lists of registered voters. Zogby International surveys employ sampling strategies in which selection probabilities are proportional to population size within area codes and exchanges. Up to are made to reach a sampled phone number. Cooperation rates are calculated using one of AAPOR's approved methodologies<sup>1</sup> and are comparable to other professional public-opinion surveys conducted using similar sampling strategies.<sup>2</sup> Weighting by *region, party, age, race and gender* is used to adjust for non-response.

### Region

North	393	36.0	36.0	36.0
Central	361	33.0	33.0	69.0
South	339	31.0	31.0	100.0
