Office of Public Relations

GallowNorma Bakes, associate professor of education, has been holding the event as a wa mathematical concepts and art in a fun and entertaining way.

The exent takes place from 2:0 to 2:20 p.m. on April 2,12001n bwer FMg of the main campus here.

Origami, the ancient Japanese art of folding paper to create three-dimensional art, allows Bakes to demonstrate principles of mathematics to her students while enjoying a creative process. The event is also a teaching opportunity for Bakes to discuss the rich cultural and historical ties Origami has to other countries. Presenting this past summer at the 5th hternational Conference on Origami in Science thematics, and Eucation (5OS) In Singapore, Bakes has found that such practices benefit udents' isualization skills in math.
